Frisbii

Usage-based billing pricing models*

*These definitions are based on the Frisbii usage-based billing pricing models - other vendors might define them differently

FLAT

Price is based on the number of units, with a fixed price per unit within each quantity range. Once a different range is reached, a new price applies.

up to 100 units	100+ units
1€ / unit	0,80€ / unit (for all units)

GRADUATED

Pricing applies progressively. As quantity increases through ranges, each block of units is charged at the rate for that range..

Next 500 units
0,80€ / Unit

first 500 units
1€ / Unit

VOLUME

Customers are charged a fixed price for the tier their usage falls into, regardless of where within that range their usage lies.

500 units — 10€

1500 units — 15€

GRADUATED VOLUME

Usage progresses through tiers, with each tier charged separately as customers move through them..

251 - 1000	10€
101-250	7€
1-100 units	5€

= 22€ for 1000 units

PERCENTAGE-BASED

Charge a percentage of processed value based on the applicable value range.

All monetary transactions (e.g. in a web shop)

5% of sum

GRADUATED PERCENTAGE

Different percentages apply to each portion of processed value across defined bands.

Next 20.000€ processed
7% of sum

First 20.000€ processed
5% of sum

Implement usage-based pricing to your subscription plans to reach more customers, gain more data on product usage and open up a new channel for revenue growth.
